Sedimentary Geology, Volume 65, 1989

Review

Terrestrial stromatolites and laminar calcretes: a review
V.P. Wright (Reading, U.K.) 1

Research Papers

Neomorphism and cementation in ancient deep-water limestones, Cow Head Group (Cambro-Ordovician), western Newfoundland, Canada
M. Coniglio (Waterloo, Ont., Canada) 15

Detrital modes of sand and sandstone derived from andesitic rocks as a paleoclimatic indicator
G.H. Mack (Las Cruces, N.M., U.S.A.) and T. Jerzykiewicz (Calgary, Alta., Canada) 35

Sedimentological controls on gold in a late Pleistocene glacial placer deposit, Cariboo Mining District, British Columbia, Canada
N. Eyles and S.P. Kocsis (Scarborough, Ont., Canada) 45

Slope-derived deposits from the Cretaceous Interior Seaway, northwestern Colorado
J.C. Lorenz (Albuquerque, N.M., U.S.A.) and C.A. Muir (Grand Junction, Colo., U.S.A.) 69

Formation and development of a tidal inlet from a washover fan, west-central Florida coast, U.S.A.
R.A. Davis, Jr., M. Andronaco and J.C. Gibeaut (Tampa, Fla., U.S.A.) 87

Evolution of Atchafalaya lacustrine deltas, south-central Louisiana
R.S. Tye and J.M. Coleman (Baton Rouge, La., U.S.A.) 95

The Alpine Haselgebirge Formation, Northern Calcareous Alps (Austria): Permo-Scythian evaporites in an alpine thrust system
C. Spötl (Bern, Switzerland) 113

The geological significance of manganese distribution in Jurassic–Cretaceous rocks of the Pindos Basin, Peloponnese, Greece
G. Pe-Piper (Halifax, N.S., Canada) and D.J.W. Piper (Dartmouth, N.S., Canada) 127

Preservation of interdraa and plinth deposits by the lateral migration of large linear draas (Lower Permian Yellow Sands, northeast England)
L.B. Clemmensen (Copenhagen, Denmark) 139

Flood deposits in the Tweed Esker (southern Ontario, Canada)
J. Shulmeister (Kingston, Ont., Canada) 153

Peloidal fabrics in Upper Jurassic reefal limestones, Weald Basin, southern England
S.Q. Sun and V.P. Wright (Reading, U.K.) 165

Comparative studies of moment, graphic and phi measures on the sands of the East Coast beaches, India
O.S. Chauhan and A.K. Chaubey (Goa, India) 183

Classification of poorly-sorted sedimentary rocks
A.C.M. Moncrieff (Cambridge, U.K.) 191

Discussion

Sedimentology and clast fabric of subaerial debris flow facies in a glacially-influenced alluvial fan—a discussion
M. Church and J.M. Ryder (Vancouver, B.C., Canada) 195

Reply to M. Church and J.M. Ryder's discussion of "Sedimentology and clast fabrics of subaerial debris flow facies in a glacially-influenced alluvial fan"
N. Eyles and S.P. Kocsis (Scarborough, Ont., Canada) 197

Book Reviews

The Cambridge Guide to the Earth by David Lambert—L.F. Jansa 199

Regional Stratigraphy of North America by W.J. Frazier and D.R. Schwimmer—G.M. Young and A.C. Lenz 200

0037-0738/89/$03.50 © 1989 Elsevier Science Publishers B.V.

Sand by R. Siever—K.J. Weber 201
Diagenesis, 1. Developments in Sedimentology, 41 edited by G.V. Chilingarian and K.H. Wolff—A.M. Evans 203

Special Issue:

Zoned Carbonate Cements: Techniques, Applications and Implications

Edited by B.W. Sellwood

Zoned calcite cements: has analysis outpaced interpretation?
D. Emery (Sunbury-on-Thames, U.K.) and J.D. Marshall (Liverpool, U.K.) 205
The laser microprobe and its application to the study of C and O isotopes in calcite and aragonite
P.C. Smalley, D.E. Stijfhoorn, A. Råheim, H. Johansen (Kjeller, Norway) and J.A.D. Dickson (Cambridge, U.K.) 211
High-resolution scanning proton microprobe studies of micron-scale trace element zoning in a secondary dolomite: implications for studies of redox behaviour in dolomites
D.G. Fraser, D. Feltham and M. Whiteman (Oxford, U.K.) 223
Determination of both chemical and stable isotope composition in milligramme-size carbonate samples
M.L. Coleman, J.N. Walsh and R.A. Benmore (London, U.K.) 233
Sector zoning in natural and synthetic calcites
R.J. Reeder and J. Paquette (Stony Brook, N.Y., U.S.A.) 239
Fir-tree zoning: an indicator of pulsed crystallization in calcite cement crystals
M.J. Raven (Nottingham, U.K.) and J.A.D. Dickson (Cambridge, U.K.) 249
Cathodoluminescence of carbonate-cemented Holocene beachrock from the Togo coastline (West Africa): an approach to early diagenesis
P. Amieux (Lyon, France), P. Bernier (Villeurbanne, France), R. Dalongeville and V. Medwecki (de) (Lyon, France) 261
A syndepositional meteoric phreatic lens in the Middle Jurassic Lincolnshire Limestone, England, U.K.
D. Emery (Sunbury-on-Thames, U.K.) and J.A.D. Dickson (Cambridge, U.K.) 273
Dolomite calcitization and cement zonation related to uplift of the Raisbury Formation (Zechstein carbonate), northeast England
M.R. Lee and G.M. Harwood (Newcastle upon Tyne, U.K.) 285
Zoned authigenic magnesites in the Rotliegend Lower Permian, southern North Sea
K. Purvis (Reading, U.K.) 307
Meteoric phreatic diagenesis in cyclic late Dinantian carbonates, northwest England
A.D. Horbury (London, U.K.) and A.E. Adams (Manchester, U.K.) 319
Origins of some Early Carboniferous calcrete fabrics revealed by cathodoluminescence: implications for interpreting the sites of calcrete formation
V.P. Wright (Reading, U.K.) and C. Peeters (Heverlee, Belgium) 345
Trace element and isotope geochemistry of zoned calcite cements, Lake Valley Formation (Mississippian, New Mexico): insights from water–rock interaction modelling
W.J. Meyers (Stony Brook, N.Y., U.S.A.) 355

ExpresSed
Note on the maximum upward migration of pore water in response to sediment compaction
P. de Caritat (Canberra, A.C.T., Australia) 371
